

PennHIP Report

Referring Veterinarian: Dr John Link	Clinic Name: Deer Creek Animal Hospital OK
Email: dtrjohn@coxinet.net	Clinic Address: 20501 Southeast 29th Street Harrah, OK 73045
	Phone: (405) 391-6220
	Fax: (405) 391-5955

Patient Information

Client: Longoria, Tony	Tattoo Num:
Patient Name: Shelby	Patient ID: 101944
Reg. Name: St James Shelby is out a racin	Registration Num: PR220345
PennHIP Num: 155701	Microchip Num: 985113004553047
Species: Canine	Breed: STANDARD POODLE
Date of Birth: 04 Aug 2019	Age: 20 months
Sex: Female	Weight: 24 lbs/10.9 kgs
Date of Study: 22 Apr 2021	Date Submitted: 04 Jun 2021
Date of Report: 11 Jun 2021	

Findings

Distraction Index (DI): Left DI = 0.24, the right DI was not computed.
 Osteoarthritis (OA): **No radiographic evidence of OA for either hip.**
 Cavitation/Other Findings: Cavitation was present on the right hip. Cavitation is harmless to the hip, however it can artificially and temporarily increase the distraction index. Therefore, no laxity score is provided for the right hip.

Interpretation

Distraction Index (DI): One hip cannot be used for the laxity ranking (see Findings). The opposite hip will be used in the analysis. The value of the DI is 0.24.
 OA Risk Category: The DI is less than or equal to 0.30. This patient is at minimal risk for hip OA.
 Distraction Index Chart:

STANDARD POODLE

BREED STATISTICS: This interpretation is based on a cross-section of 5308 canine patients of the STANDARD POODLE breed in the AIS PennHIP database. The gray strip represents the central 90% range of DIs (0.29 - 0.69) for the breed. The breed average DI is 0.46 (solid square). The patient DI is the solid circle (0.24).

SUMMARY: The degree of laxity (DI = 0.24) ranks the hip within the tightest 5% of DIs for the breed. This amount of hip laxity places the hip at a minimal risk to develop hip OA. **No radiographic evidence of OA for either hip.**
